

Systems Management Provider LANrev LP introduces LANrev 3.0 Network Management Software

LANrev LP announces the release of version 3.0 of LANrev Network Management Software for heterogeneous networks. LANrev 3.0 is designed to standardize management for networks that consist of live cross-platform systems.

Addison, Texas — May 31, 2006 — LANrev LP, today announced the release of version 3.0 of LANrev Network Management Software for heterogeneous networks. LANrev 3.0 adds to the industry-leading LANrev cross-platform architecture, over 50 new features, including Macintosh imaging, Windows Patch Management, additional systems management and many other new features and significant enhancements.

“LANrev 3.0 Network Management offers a unique solution set built with LANrev’s powerful, patent pending technology,” said Peter Frankl, co-founder of LANrev LP, “IT organizations are able to standardize network management support for diverse platforms while having unprecedented control and functionality across the distributed enterprise.”

LANrev 3.0 Network Management Software now includes LANrev’s revolutionary LANrev ImageLive technology, allowing administrators to deploy complete disk images to remote Mac computers even while those computers are in use. This means that complete disk imaging can be deployed “live” without any interruption to the end-user. LANrev 3.0 Network Management Software also includes fully automated patch management for both Windows and Macintosh platforms. LANrev 3.0 Network Management Software will automatically determine which patches are needed for which OS version, and direct them to the appropriate systems.

Other new features in LANrev 3.0 Network Management Software include:

- Remote control integration for the industry’s most popular remote control tools
- LANrev Network Management Software agent auto-update and auto-deployment
- LANrev Server Database can now be dynamically exported to an external SQL database via ODBC
- Software distribution package can now include an installation condition
- Various improvements to LANrev License Management

To download a case study of the LANrev 3.0 Network Management Software, please visit:
