

## **Lifecycle Management Provider LANrev LP introduces LANrev 3.1 Client Management Software**

*LANrev LP announces the release of version 3.1 of LANrev Client Management Software for heterogeneous networks. LANrev 3.1 is designed to standardize life cycle management for networks of diverse clients and infrastructure.*

Addison, Texas — July 27, 2006 — LANrev LP, a leading lifecycle management provider, today announced the release of version 3.1 of LANrev Client Management Software for heterogeneous networks. LANrev 3.1 adds to the industry-leading LANrev cross-platform architecture, several new features, including “smart” distribution groups, bandwidth throttling, additional systems management and many other new features and significant enhancements.

“With LANrev 3.1 Client Management we have continued to enhance the management of clients in today’s corporate and educational environments,” said Peter Frankl, co-founder of LANrev LP, “Whether managing 100 or 100,000 clients, LANrev will automate and facilitate all aspects of lifecycle management thereby improving operational efficiency and adding services while reducing total cost of ownership.”

LANrev 3.1 Client Management Software further enhances LANrev’s revolutionary LANrev ImageLive technology. ImageLive allows administrators to deploy complete disk images to remote Macintosh computers even while those computers are in use.

Other new features in LANrev 3.1 Client Management Software include:

- Smart distribution groups – dynamically define computer groups for software deployment.
- Bandwidth Throttling – Control your network traffic while deploying software or images.
- Improved License Reporting
- Multiple performance enhancements
