

For Immediate Release

LANREV RELEASES LANREV 5.1 FOR MAC OS X AND WINDOWS

Update adds iPhone Management and On-Demand Software Installation.

Addison, Texas – March 25, 2009 - LANrev LP today announces the immediate availability of LANrev 5.1, an update to their industry-leading systems lifecycle management suite for Mac OS X and Windows. Affordable and easy-to-use, LANrev enables the management of enterprise systems by automating patch and software distribution, asset inventory, eco-friendly power management, license monitoring and security configuration.

LANrev collects and reports hundreds of details about hardware and software, monitors software license compliance, automates distribution and installation of applications, updates and patches, and helps remotely configure all managed systems. LANrev's clean, intuitive interface and flexible architecture easily adapt to any network environment.

LANrev version 5.1 adds tremendous new features, including extensive iPhone management support, on-demand software installation for users, customizable agent branding and enhanced power management reporting.

"Apple's iPhone has penetrated the enterprise swiftly," said Peter Frankl, LANrev Founder and COO, "LANrev's iPhone management enables IT to have unprecedented visibility and control of their burgeoning iPhone population."

Major enhancements in LANrev 5.1 include:

- * Extensive iPhone management support
- * On-Demand software installation
- * Enhanced Power Management reporting
- * Custom user branding for client software distribution dialog
- * Improved Help Desk Integration
- * Client software localized in English, French, German and Spanish

Through the use of LANrev's Power Management, IT administrators can realize a significant reduction in their enterprise-wide energy usage thereby lowering their carbon footprint while reducing costs. According to Energy Star, power management can save organizations as much as \$75.00 annually per computer.

This translates to as much as a \$75,000.00 savings for an enterprise with 1,000 computers. Many North American power companies are now offering significant rebates to enterprises that utilize power management software such as LANrev, to reduce power consumption. These rebates enable an even faster return on investment and further reduce LANrev's already low cost of procurement.

LANrev can be installed on a single server to manage a small network, or in a distributed architecture managing thousands of desktops. LANrev is a uniquely seamless, multiplatform solution, allowing management of, or by, virtually any Mac OS X or Windows computer.

Pricing and Availability:

LANrev 5.1 is available immediately for evaluation from LANrev. For pricing information please visit LANrev online or call (214) 459-0136.
