

LANrev SMS Integration Now Supports Microsoft Systems Center Configuration Manager 2007

Update Supports the Latest Microsoft Management Tools and Platforms

Addison, TX, April 8, 2008 — LANrev, a global leader in lifecycle management software for multi-platform environments, announced that the recent LANrev 4.6.3 release includes an extensive update to the LANrev integration with Microsoft's Systems Management Server (SMS). The update adds support for Microsoft's Systems Center Configuration Manager (SCCM) 2007. Additionally LANrev now fully supports Microsoft Windows 2008 Server including automated Patch Management.

The LANrev SMS integration facilitates the transfer of Macintosh computer data to the SMS database enabling management of the data from within the SMS framework.

"This update to LANrev's SMS integration is the result of our relentless attention to customer feedback, said Martin Bestmann, founder and CTO of LANrev, "SCCM and Windows 2008 Server will be deployed extensively in the Enterprise in the near future. LANrev's enablement of a single source solution results in extraordinary efficiency improvements and a rapid ROI."

Microsoft Windows 2008 Server Patch Management is fully automated from within LANrev's Software Distribution Center. Keeping your most important workstations and servers fully up to specification has never been easier.

The complete LANrev 4.6.3 Suite is available for evaluation at <http://www.lanrev.com/product/download.shtml>
