

**For Immediate Release**

## **LANREV RELEASES LANREV 5.0**

### **Upgraded Solution Features Power Management and FDCC Compliance Management**

Addison, TX - October 23, 2008 - LANrev LP today announced the immediate availability of the latest version of its systems lifecycle management solution, LANrev® 5.0, which premieres advanced new features to ease and enhance the management of enterprise systems through the addition of eco-friendly power management, augmented license monitoring, enhanced modularized software distribution and FDCC scanner support.

“Today’s corporate, education and government enterprises are implementing programs to reduce their carbon footprint and impact on the environment,” said Peter Frankl, LANrev Founder and COO, “LANrev’s power management technology enables IT to manage and reduce energy costs while reducing waste in an automated, sustainable manner.”

Through the use of LANrev’s Power Management, IT administrators can realize a significant decrease in their enterprise-wide energy costs improving their carbon footprint while reducing costs. According to Energy Star, power management can save organizations as much as \$75.00 annually per computer. This translates to as much as a \$75,000.00 savings for an enterprise with 1,000 computers.

Major enhancements in LANrev 5.0 include:

- Improved User Interface
- More Granular Asset Inventory
- Endpoint Security and Vulnerability Management
- Enhanced Software Distribution
- Customized License Management

The complete LANrev 5.0 Suite is available for evaluation at <http://www.lanrev.com/product/download-lanrev.html>
